Education in the Heart of Europe

 **Slovakia**

Slovakia

Area	49 035 sq. km (18 933 sq. miles)
Capital city	Bratislava (population: 452 288)
Population	5.4 million
Official language	Slovak
State system	Republic
Political system	Parliamentary democracy
EU member	Since 2004
Time	Central European time (GMT+1)
Currency	Euro
Borders	Hungary, Poland, Czech Republic, Austria, Ukraine
Location	Central Europe (17° - 22° E, 47° - 49° N) The central and northern part of Slovakia is mountainous (the Carpathian arc), whereas lowlands are prominent in the south and the east of the country (important agricultural regions). The Danube is the most important river in Slovakia, connecting the capital of Bratislava with the capitals of two neighbouring countries — Vienna in Austria and Budapest in Hungary.
Climate	Temperate climate zone with a cycle of four seasons, the average temperature in winter is -2°C (the coldest month is January, the coldest region is the High Tatras) and 21°C in summer (July and August are the warmest). Snow cover can last on average 130 days in some mountain ranges.

The Education System in Slovakia

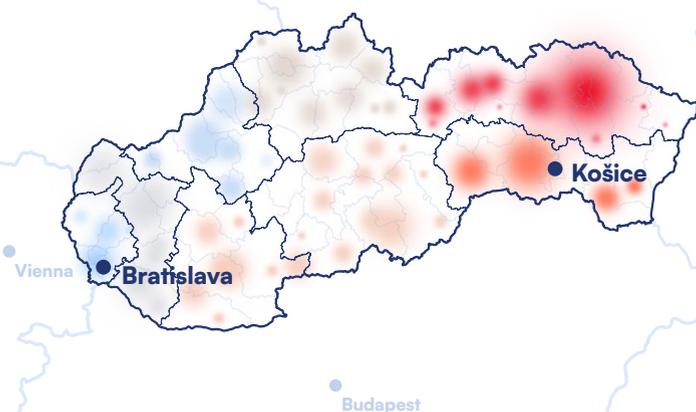

The education system in Slovakia comprises a variety of schools that provide education to thousands of children and young people. These schools differ in focus and type of management, yet together they form the foundation for building an educated society.

Primary Schools

- Number of schools: **2 000**
- Church schools: **90**
- Private schools: **110**
- Public schools: **1 800**
- Number of students: **490 000**

Secondary Schools

- Number of schools: **800**
- Number of teachers and specialists: **21 000**
- Number of students: **230 000**

DigiEDU: Schools for the 21st Century

Our Mission

The goal of the DigiEDU national project is to bridge the digital divide across Slovakia. We ensure that every student and teacher—regardless of location or needs—has equal access to digital education. We are transforming schools into **modern, connected classrooms**, fostering the digital skills essential for the future.

The project stands on three pillars

- Digital Equipment:** Supplying modern laptops, tablets, computers and other hardware for students and staff, including tools for inclusive education.
- Infrastructure:** Building secure, high-speed LAN/WLAN networks to ensure stable internet access in every class.
- Software & Support:** Providing necessary software licenses to fully utilize the new technology in teaching.
